Results of Singapore Rough Emerald Auction

19 July 2011

Gemfields plc (AIM: “GEM”) is pleased to announce the results of the auction of (predominantly higher quality) rough emeralds held in Singapore from 11-15 July 2011.

Highlights

- Record auction revenues of USD 31.6 million
- A 63% increase in quality-for-quality per carat prices since December 2010
- Seven auctions held since July 2009 have generated revenues totalling USD 87.5 million
- Auction results underscore robust global demand for Gemfields’ ethical Zambian emeralds
- Next auction of (predominantly higher quality) rough emeralds is scheduled for November 2011

Gemfields held an auction of (predominantly higher quality) rough emeralds in Singapore from 11 to 15 July 2011. Thirty nine companies were invited to attend the auction, with thirty eight of these placing bids for the material on offer. The auction saw 1.07 million carats mined by Gemfields placed on offer, with 0.74 million carats being sold and generating record auction sales of USD 31.6 million.

When compared with the higher quality auction held in December 2010, per carat prices showed a 63% increase from USD 26.2 per carat to USD 42.7 per carat. This provides a clear indication of robust growth in both prices and demand for emeralds in general, and Gemfields ethical emeralds in particular.

This was the first auction of the current financial year. The seven auctions held since July 2009 generated USD 87.5 million in aggregate revenues.

Gemfields’ next auction of (predominantly higher quality) rough emeralds is scheduled for November 2011. The results of the five higher quality rough emerald auctions held to date are summarised below:

The Singapore auction was also used as a platform to test the potential levels of demand for rough emerald and beryl made available from other sources of supply (i.e. not certified as having been mined by Gemfields). None of this material is included in the data presented above. The trial comprised of other rough emerald and beryl from Brazil and also from Zambia. The results of this trial were not of themselves material and the Company will continue to refine and evolve the opportunities of selling rough emeralds from other sources of supply.

The results of the two lower quality rough emerald and beryl auctions held to date are summarised below:

Ian Harebottle, CEO of Gemfields, commented:

"Gemfields is delighted to announce record sales from its most recent auction. The results are testament to the Company's ongoing focus on marketing to both consumers and retailers, and the quality and consistency of the emeralds produced at Kagem. Our team and industry partners are working harder than ever to deliver on our vision of ensuring that coloured gemstones are recognised and appreciated alongside diamonds and other luxury goods. Gemfields continues to deliver on the promises we've made to our clients, consumers and shareholders".
